F18S010U

Linear Low Density Polyethylene Film

Product Description and Typical Applications:

F18S010U is a Linear low density polyethylene (LLDPE) resin for blown film extrusion offering excellent processability with optimum balance of mechanical and optical properties. It has adequate level of slip and anti -blocking agent for good openability and slip characteristics of the film. It offers excellent drawdown capability for thinner gauge films. Its low gel count, resistance to leakage & pinholes, excellent sealing characteristics make it preferred choice for consumers in Industrial/ consumer packaging for various applications.

It is recommended for general purpose, heavy duty and liquid packaging in laminated/ non-laminated blown film applications.

Property	Values*	Unit	Test Method
Melt Flow Index (I ₂)	1.0	g/10min	ASTM D1238
Density	0.918	g/cc	ASTM D1505
Tensile Strength @Break (MD/TD)	400/270	kg/cm ²	ASTM D882
Elongation @Break (MD/TD)	580/750	%	ASTM D882
Tear Strength (MD/TD)	6/15	g/ mic	ASTM D1922
Dart Impact Strength	3.0	g/ mic	ASTM D1709

* Typical characteristics of the product given purely as a guide. Film properties were measured on 25.4 micron blown film extruded at a blow up ratio (BUR) 2.5.

Processing Guidelines:

Barrel temperature: 180 - 220°C

Blow up ratio: 2.0 to 3.0

Regulatory Information:

Certificate is available on request.

Packaging & Storage:

F18S010U is available in natural colour/pellet form in 25 kg strong bags made of woven fabric. The product should be stored in dry conditions at temperature below 50°C and protected from UV light.
