

**INTRODUCTION  
 FOR  
 "JADE" Brand "CZ-328" BOTTLE-GRADE POLYESTER CHIPS**

With development of China's economy and increasingly improvement of the people's living standard, various packing and bottle industry has been developed rapidly. The bottle-grade polyester chips are widely used with the advantages of no poison, no odor, no smell, excellent transparency, high strength & high isolation and good processing feature. Therefore, it becomes the preferred material for package bottles of drinking water, soft drink, non-drink and sheet material industry.

"JADE" Brand "CZ-328" bottle-grade polyester chips are suitable for making packing bottles for carbonated drinks and 3-gallon, 5-gallon big bottles. The product features low heavy metal content, low content of acetaldehyde, good color value, stable viscosity and good for processing. With a unique process recipe and production technology, strengthening the process control and quality management, the brand of new product with excellent isolation property is effective in protecting the carbon dioxide from leaking, good in pressure resistance, low temperature processing, wide scope in processing, excellent in transparency, high in finished product rate and can effectively prevent bottles from breaking for the carbonated drinks which are in storage period and under pressure.

By applying most advanced technology and introducing the powerful equipments from DuPont USA and Buhler Co., Ltd. Switzerland respectively, the plant strictly organizes production and management based on the requirements stipulated in ISO 9002 Quality Guarantee System. The quality of "JADE" Brand serial bottle-grade polyester chips is reliable and worthy to be trusted by all customers.

Quality Indices for JADE" Brand "CZ-328" Bottle-grade Polyester Chips		
Item	Unit	Index
I.V.	dL/g	0.85 ± 0.02
Crystallinity	%	≥ 60
Color value	L	≤ 83
	b	≤ 0.5
Content of acetaldehyde	PPM	≤ 1.0
Dust content	PPM	≤ 100
Melting point	°C	≤ 245
Wt. of 20 chips	g	0.34 ± 0.01
